Subject: West Plains Public Water System information and DOH letter for your review
Date: Tuesday, October 24, 2017 4:25:29 PM
Attachments: [Fairchild Area Wells - Area of Concern.pdf](#)
[List of Wells in Area of Concern.xlsx](#)
[PFAS West Plains letter to PWSs final draft.docx](#)

Hello Marc and Zac:

The purpose of this email is to follow up on items discussed at our October 5th phone meeting.

1. Attached is a map entitled **Fairchild Area Wells – Area of Concern**. Sheryl Howe delineated the area of concern based on hydrogeological information about the area. The boundaries of our area of concern may be revised in the future, pending further information and analysis. The map identifies all public water system (PWS) wells (sources) in the area of concern for which we have a record.
2. Also attached is an excel spreadsheet, **List of Wells in Area of Concern**, from our record of public water system wells (sources) in the area of concern. The final column on the spreadsheet, column S, shows the PWS Source ID Number, which matches up with the wells shown on the map. Here's a key to all of the information contained in the spreadsheet:

Column	Information
A	Public Water System (PWS) ID number
B	Source number
C	Source name
D	Source use
E	Public Water System name
F	Group A or Group B PWS
G	PWS type*
H	Primary contact name
I	
J	
K	Primary contact address
L	
M	
N	
O	
P	Primary contact email
Q	Maximum total population
R	Total connections

S	PWS Source ID number
---	----------------------

*Community; Non Transient Non-Community (e.g. a workplace); or Transient Non-Community (e.g. a business)

We have additional information for each well, including latitude/longitude coordinates, the date each well was activated, and quite a bit of other information that I removed to make the spreadsheet easier to navigate. If you would like a copy of the full data spreadsheet, please let me know.

This fulfills your request to DOH for a list of all the public water systems in the area of concern, along with contact information for each water system. If this does not meet your needs, please let me know.

Zac and Marc, on 10/6 Zac sent me a table with 5 or 6 public water systems that were included in the current FAFB sampling area. Thank you for that information. Zac's email also mentioned the discovery of another community well within the Airway Heights area. However, I'm still not entirely clear on which PWS wells have been 1) contacted by FAFB and 2) had their well(s) tested.

- **I have a request: Could you go through the attached list of 78 PWS wells and tell me which ones, to date (for all previous and current sampling areas)**
 - a. **Were contacted by FAFB and offered to have their wells sampled?**
 - and**
 - b. **Had their wells sampled?**
- **Could you also notify me in the future, as part of future new/expanded FAFB sampling area activities, as to which public water systems on this chart were contacted by FAFB, and whether or not sampling was conducted on their well(s)?** Thank you. If you are unable to fulfil this request for any reason, please let me know.

3. The third attachment is a final draft of a letter that will be sent out to all of the public water systems listed on the attached spreadsheet. I mentioned the letter to you at the phone meeting, and you requested a copy. Please note that the letter says the following:
 - a. *The enclosed map shows previous and current FAFB sampling areas. If you are located in one of FAFB's sampling areas and have not been contacted by FAFB there is still time to contact them and have your well tested. The FAFB Public Affairs Office can be reached at 509-247-5705 or by email at 92arw.pa@us.*

We will include the latest FAFB map of sampling areas with the letter. The latest version I have is the one sent by Zac on 10/5, and the date on the map is 09/28/2017. **Is this the most current version of the FAFB sampling area map?**

We will be sending the letter possibly as soon as (but no sooner than) this Friday. If you have

any concerns or questions about the letter, please let me know at your earliest convenience.

Best regards,

Dorothy
